

To: WG5/X3J3
From: WG5 Convenor
Subject: Result of SC22 ballot on Technical Corrigendum 3 to IS 1539:1991
Date: 12 February 1997

The result of the ballot was as follows:

"P" Members supporting approval without comments	14
"P" Members supporting approval with comments	1
"P" Members not supporting approval	0
"P" Members Abstaining	1
"P" Members not voting	5

Note: The comment accompanying the abstention vote from Denmark was "Due to lack of Danish expertise".

The comment accompanying the affirmative vote from Japan was: "In the fifth line of the subclause "14.1.2.3" (on page 242), "for each argument or operand" should be changed to "for each operand".

The comment accompanying the affirmative vote from Japan has been forwarded to SC22/WG5 for consideration in developing the final text for publication.

It is suggested that the proposal made by Japan should be accepted and that the same change be made to the text of DIS 1539-1 before the final text is submitted to ITTF for publication.
