

ISO/IEC JTC1/SC22/WG5 N1276

Disposition of Comments arising from the SC22 ballot on Technical Corrigendum 3 to IS 1539:1991

The ballot received unanimous approval from those member bodies voting; there was only one comment, accompanying an approval vote from Japan. This was discussed at the meeting of SC22/WG5 in Las Vegas, 10-14 February 1997 and the proposed edit was accepted unanimously.

The revised Technical Corrigendum is, therefore, identical to that approved by the SC22 ballot with the addition of the edit proposed by Japan.
