

**US National Body Report - June 1998**

X3J3 met according to its customary quarterly schedule. Meetings were located in Las Vegas, Lafayette, Breckenridge, and Terre Haute.

Due to a combination of delays in F95 processing, technical report processing, and thorny F2K issues, interpretation processing was largely put on hold; it is expected that this work will resume in earnest shortly.

The status of the various work items is detailed in the Primary Development Body's status report.
