

ASSOCIATION FRANCAISE DE NORMALISATION
Groupe de Travail FORTRAN (GT5)

French National Activity Report presented for the meeting of
ISO/IEC JTC1/SC22/WG5 (Fortran), Cadarache, France, June 14-18, 1999

The french GT/WG-5 has 4 active members, one of C.E.A., the 3 others more or less of "university" nature. It meets regularly once every 2/3 months, half a day each time. We also conduct intense e-mail activities. AFNOR has voted in the Fortran-related ballots since the last WG5 meeting, adopting every project, sometimes with editorial comments.

Besides, we were very busy to prepare the Cadarache meeting of June 99, and the papers on object orientation in Fortran-2k that we intended to promote.
