

**Japan's National Activity Report
for the WG5 meeting in Cadarache**

SC 22/Fortran WG of ITSCJ (Information Technology Standards Commission of Japan) currently has 11 members. Its meetings are held monthly, half a day each time, in Tokyo.

Japan voted affirmatively for all the recent ballots, with some editorial comments.

Translation work for the Japanese version of the Part 3 (coco) has just begun. There is no plan for Japanese versions of the two TRs.

The following Web page provides some information in English:
