* joint meeting with J3/PL22.3

† J3/PL22.3 meeting was held in the following week in the same location, except 1985 (Oxford), 1989 (Vienna), 1990 (Oxford), 1992 (Seattle), 1993 (Brussels)

Further notes on papers from meetings from 1978 to 1981

1978: US premeeting contribution is in 65(*) JCA-11. Meeting papers are numbered 1-36.

1979: US premeeting contribution is in 70(*) JCA-7. Meeting papers are numbered 37-59.

1980: Meeting papers are numbered 60-91 and are included in X3J3/133.

1981: Papers discussed at the meeting appear in X3J3/135.

Notes:

1. The present WG5 document numbering scheme was started following decisions taken at the 1986 meeting. Numbers N1 to N99 were allocated retrospectively to WG5 documents issued prior to the 1985 meeting and N100 to N199 to documents issued between the 1985 and 1986 meetings. All documents from N1097 onwards, together with some earlier minutes and resolutions, are in the electronic archive at <ftp://ftp.nag.co.uk/sc22wg5/>. A complete index from N200 onwards is in WG5 Standing Document 1.
2. Full attendance lists are not available for all meetings. In some cases attendance figures have been estimated from voting tallies and/or other reports.
3. The agenda document number is the later one if more than one was issued.
4. It is not known whether there were ad hoc Fortran meetings at the 1964, 1965 or 1967 SC5 meetings, but it is known that SC5 were collaborating with X3.4.3 on Fortran at that time, particularly with regard to production of French and Japanese versions of Fortran 66.
5. For the 1980, 1982 and 1984 meetings, the records of the meetings themselves are in the stated WG5 papers; the referenced X3J3 papers contain also the accompanying documents for the meetings.
